

SCAN COIN

XC3 Change Machine

SCAN COIN XC3 Change Machine

The XC3 note and coin change machine incorporates the very latest developments in coin handling technology. It is ideal for a wide range of change applications.

It pays out three denominations of coin from universal hoppers, each fitted with a large hopper extension. The note and coin changer combines capacity with security to reach a new level in style, functionality and reliability.

It is suitable for installation in a wide range of applications, such as, arcades and sports centres, banks, retail operations and casinos.

The XC3 changer uses a secure note and coin reader, which combines high acceptance rates with excellent security. It can be supplied for most currencies and denomination.

When a note or coin is accepted, the correct change is paid out into the internal payout tray. Each transaction is recorded on non-resettable audit counters.

Any payout combination may be programmed by the operator using a simple teach system. Payout can be coins or tokens. The standard hopper can payout any denomination of coin between 16mm and 31mm diameter without adjustment. Special versions are available for smaller coins.

Hopper override switches allow easy emptying of the hoppers for auditing, when the number of coins dispensed are accurately counted and displayed on the LED display, making manual counting unnecessary.

Key Features

- Accepts up to 8 types of note and 6 types of coin
- Dispenses 3 types of coin from Universal hoppers
- 20,000 coin capacity
- 4 digit LED display with all transactions recorded and viewable on counters
