

SCAN COIN Connect Value

Data collection software

30 DAYS
Free Trial!

SCAN COIN Connect Value software can be linked to multiple note or coin counters/sorters to provide efficient data collection.

Collect data cost-effectively

Connect Value is a new, easy-to-use application that provides a flow of data from multiple counters or sorters to Microsoft® Office Excel. This fast and effective solution is easy to install and requires little operator training for optimal use.

The software is designed for cash handling environments with cash throughput spread over a number of machines. Connect Value is intended as a better alternative to manual "pen and paper" handling of data. It is highly suitable in cases where assistance is needed to boost the data processing efficiency of counting activities.

This new application is the latest addition to the Connect family of software products such as Connect CDP and Connect CDS – a range that aims to monitor, link and simplify cash handling activities.

- Customise up to 8 headings in the Excel file – for instance user identification, cash book number, customer, date of the count, accounting date, etc. – in addition to data sent automatically from the machines.
- Utilise Excel – more or less everybody has this software installed and is familiar with using it. Data sent to the Excel file can be subsequently displayed, processed or exported according to the customer's requirements.

Key benefits

A new alternative in data collection

- Improves data collection efficiency for small-scale cash handling operations with multiple machines.
- Eliminates labour-intensive "pen and paper" data handling.

Easy from all angles

- Easy to install, simply connect your machine(s) to your PC.
- Easy to learn, little training is required for optimal use.
- Easy to use, offering a simple interface between your counters/sorters and Excel.

Ideal as a back-office solution in smaller retail environments.

Facilitates your day-to-day cash follow-up.

Connect your coin and note machines to Connect Value.

Reliable hardware and reliable software – a great combination.

Using Connect Value

- Install the software and a plug-in for the machines you want to collect data from.
- Choose if you want to control the machine from Connect Value, or operate the machine as normal and simply collect data from the PC.
- Plug in Connect Value to the PC via the COM port, and to the machine via the printer port.
- View data sent automatically from Connect Value – such as the total sum, time of the count or break down of denominations – in an Excel file.

Excellent in operation

- Enables use of familiar Excel software in data processing.
- Smooth customisation of Excel file management.
- Rapidly improves the efficiency of your cash handling routines.

TECHNICAL SPECIFICATIONS

OPERATING SYSTEM	Microsoft Windows 2000 with service pack 4 (SP4), Microsoft XP or later
STANDARD PC	128 MB RAM or greater
SERIAL PORT(S) for communication	

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
