## We asked The Royal British Legion

“The SC 22 has saved time all round, and has exceeded our expectations.”

B.P.Wright  
The Royal British Legion

### ....Why did you choose the SC 22?

‘With our Poppy Appeal collection trebling we needed a more efficient and accurate system for the sorting and counting of coins. Other branches were using SCAN COIN machines with satisfaction and so I acquired the SC 22 coin sorter. The SC 22 has exceeded our expectations with its speed and accuracy. We have also been impressed with the good service and prompt attention by the SCAN COIN support team.’

### ....What are the benefits?

‘Installing the SC 22 has saved time all round, freeing our volunteers up and it allowed us to count over 400 collection boxes with ease and accuracy, obtaining both individual box totals and cumulative totals. Additionally, the SC 22 connects to our printer which has enabled us to monitor the count precisely. Acquiring the SC 22 is one of the best decisions I have ever made and I would certainly work with SCAN COIN in the future.’

## » your complete partner

The SC 22 coin sorter is popular worldwide for its superior sensor technology in combination with its small size and easy operation. The unit features automatic rejection of foreign and damaged coins, as well as programmable batch stops. It sorts up to 8 coins and counts up to 32 coins in three different counting modes. The alphanumeric display ensures easy operation of the flexible software with subtotals, grand totals, date and time. Serial interface is standard, which enables connection to a PC or a printer.
